

In the Specification:

Please replace the paragraph beginning on page 7, line 1 with the following:

As used herein, the term “application data” is intended to broadly refer to data from a software application. Examples of application data include, but are not limited to, documents such as ~~Microsoft Word~~ MICROSOFT WORD, spreadsheets such as ~~Microsoft Excel~~ MICROSOFT EXCEL, databases such as ~~Microsoft Access~~ MICROSOFT ACCESS (MICROSOFT, WORD, EXCEL and ACCESS are registered trademarks of Microsoft Corporation, Redmond WA), pre-recorded video and/or audio, graphics programs, illustrations, and the like. Although some of these applications are sometimes unchanging data, within practice of the invention they are embodied in real time data streams. A Word document, for example, may be worked on collaboratively between multiple conference rooms with its current status streamed in real time from each conference room.
